# **INTRODUCTION**

# 01. INTRO

The rise of cryptocurrencies has witnessed a remarkable transformation in the financial ecosystem, captivating both retail and institutional investors alike. However, the early adoption of prominent tokens and their subsequent price surges have left many new entrants feeling like they have missed the boat.

This has ignited a movement within the crypto developer community aimed at offering second chances for those who missed out in years gone by to level the playing field for new participants in the crypto economy.

The creators behind XRP20 have recognized the need to address this. XRP20 stands as the second coming of XRP, building upon the foundations of its predecessor while ushering in a new era of accessibility, inclusivity, utility, and simplicity.

## **The Need for Second Chances:**

**The initial emergence of cryptocurrencies was characterized by groundbreaking innovations, but it was often restricted to tech-savvy early adopters who seized the opportunity and reaped the rewards. As the crypto market matured, a knowledge gap emerged, creating barriers for potential participants seeking a less complicated way to engage with digital assets.**

**XRP20, a brainchild of community-driven ideals, aims to bridge this gap and extend a helping hand to those seeking a second chance at exploring the vast potential of cryptocurrencies. By drawing inspiration from the pioneering XRP project, XRP20 aims to democratize access to a token that has traditionally served institutional players, encouraging a more diverse and robust community - also known as the XRP Army.**

## **Easier, Seamless, and More Secure:**

**Building upon the rich heritage of XRP, XRP20 has been meticulously crafted with enhanced usability and user-friendliness in mind. Our team of dedicated experts, comprising blockchain enthusiasts and specialist developers, has left no stone unturned in streamlining the user experience.**

**XRP20 boasts a seamless onboarding process, making it easier for both novices and experienced crypto veterans to purchase, trade, and securely HODL or stake their tokens. Built on Ethereum, our commitment to security and simplicity is clear. Utilizing the state-of-the-art encryption measures of the most-used blockchain, we've decentralized the experience of owning XRP20 to help safeguard our community's assets.**

## **Embracing Community-Driven Development:**

**At the heart of XRP20 lies a thriving community that actively supports the original company's vision and efforts to fight the SEC as Ripple continues its lengthy legal battle. We firmly believe in the power of decentralization and that creating a new token for the XRP Army will strengthen the ecosystem and embolden the community's resolve in the wake of its current challenges.**

# ROADMAP

## **02. ROADMAP**

### **Presale and Token Distribution**

**Our first focus is to raise awareness about XRP20 and our mission to offer a second chance to new entrants in the evolving crypto market. Our goal is to attract early supporters and contributors through a fair and transparent presale event. The presale will be an opportunity to establish a strong and engaged community around XRP20.**

### **Pre-Launch Marketing and Awareness**

**During the presale phase we will initiate a marketing strategy that highlights the accessibility and ease of acquiring XRP20, emphasizing its value proposition as a second chance to own the token early and stake it long term to earn passive rewards.**

## **Launch and Burn Activation**

**After a successful launch on DEX, one of our core initiatives is the implementation of a token burning mechanism. XRP20 is set up as a deflationary token with a buy and burn mechanism that sends 0.1% of every buy and sell to a burn address. 10% of the total supply is also allocated to be burned. These mechanisms will reduce the token supply over time, increasing scarcity.**

## **Post-Launch Community Staking**

**XRP20 introduces on-chain staking for the XRP Army where anybody can stake their tokens to earn passive rewards. Our goal is to create a thriving community that actively engages with XRP20, driving its growth.**

**Staking becomes a focus area in this phase as we aim to foster vested interest and reward the community for locking up supply and providing long-term stability to the staking ecosystem.**

**03.**

# **TOKENOMICS**

## **03. TOKENOMICS**

**We're implementing similar tokenomics to the original XRP but giving everybody the chance to purchase XRP20 at a super-low price and stake their tokens to earn passive income.**

### **Total Supply: 100,000,000,000 Tokens**

**At the heart of the XRP20 ecosystem lies a carefully crafted tokenomics model that aims to create value, foster community engagement, and ensure a sustainable growth trajectory. With a fixed total supply of 100,000,000,000 tokens, we've set the foundation for a transparent and inclusive digital asset.**

## **Token Allocation:**

### **Public Presale: 40% (40,000,000,000 Tokens)**

The public presale phase plays a pivotal role in the project's initial development and expansion. During this phase, 40,000,000,000 tokens will be available for early contributors who share our vision for the future of XRP20. This distribution ensures a strong and committed network of stakeholders supporting the project's mission.

### **Staking: 40% (40,000,000,000 Tokens)**

We believe that active community participation is essential for the long-term success of the XRP20 ecosystem. To encourage engagement, 40,000,000,000 tokens will be dedicated to staking rewards. By staking their tokens, community members can contribute to token price stability while earning rewards for their involvement.

## **Burn Allocation: 10% (10,000,000,000 Tokens)**

To enhance token scarcity and promote value appreciation, 10,000,000,000 tokens will be permanently removed from circulation through a burn mechanism. This deflationary approach demonstrates our commitment to creating a sustainable token with increased inherent value over time.

## **DEX Liquidity: 10% (10,000,000,000 Tokens)**

A robust liquidity pool is vital for a smooth and efficient trading experience. To ensure a healthy trading environment for our community, 10,000,000,000 tokens will be allocated to the first DEX liquidity pool. These reserves will provide stable trading conditions and make it easier for participants to buy and sell XRP20 tokens.
